

QUICK SETUP GUIDE

Laptop PCs

GETTING STARTED

This quick set up guide will help you get started with your new, awe-inspiring Velocity Micro PC.

Refer to this guide for additional tips on setting up your own system. This guide does not cover advanced setup of items such as digital video or digital audio hardware.

Refer to the included manuals for assistance with these devices. Pictures shown below should accurately depict your chassis, though elements such as the arrangement of the rear I/O may vary. You will still be able to easily find all of the relevant ports, buttons and areas necessary for setting up your PC.

IMPORTANT

For initial setup, do not connect anything other than the items below. When adding additional devices, please refer to their included manuals and do them one at a time, with reboots after each install.

HAVING TROUBLE?

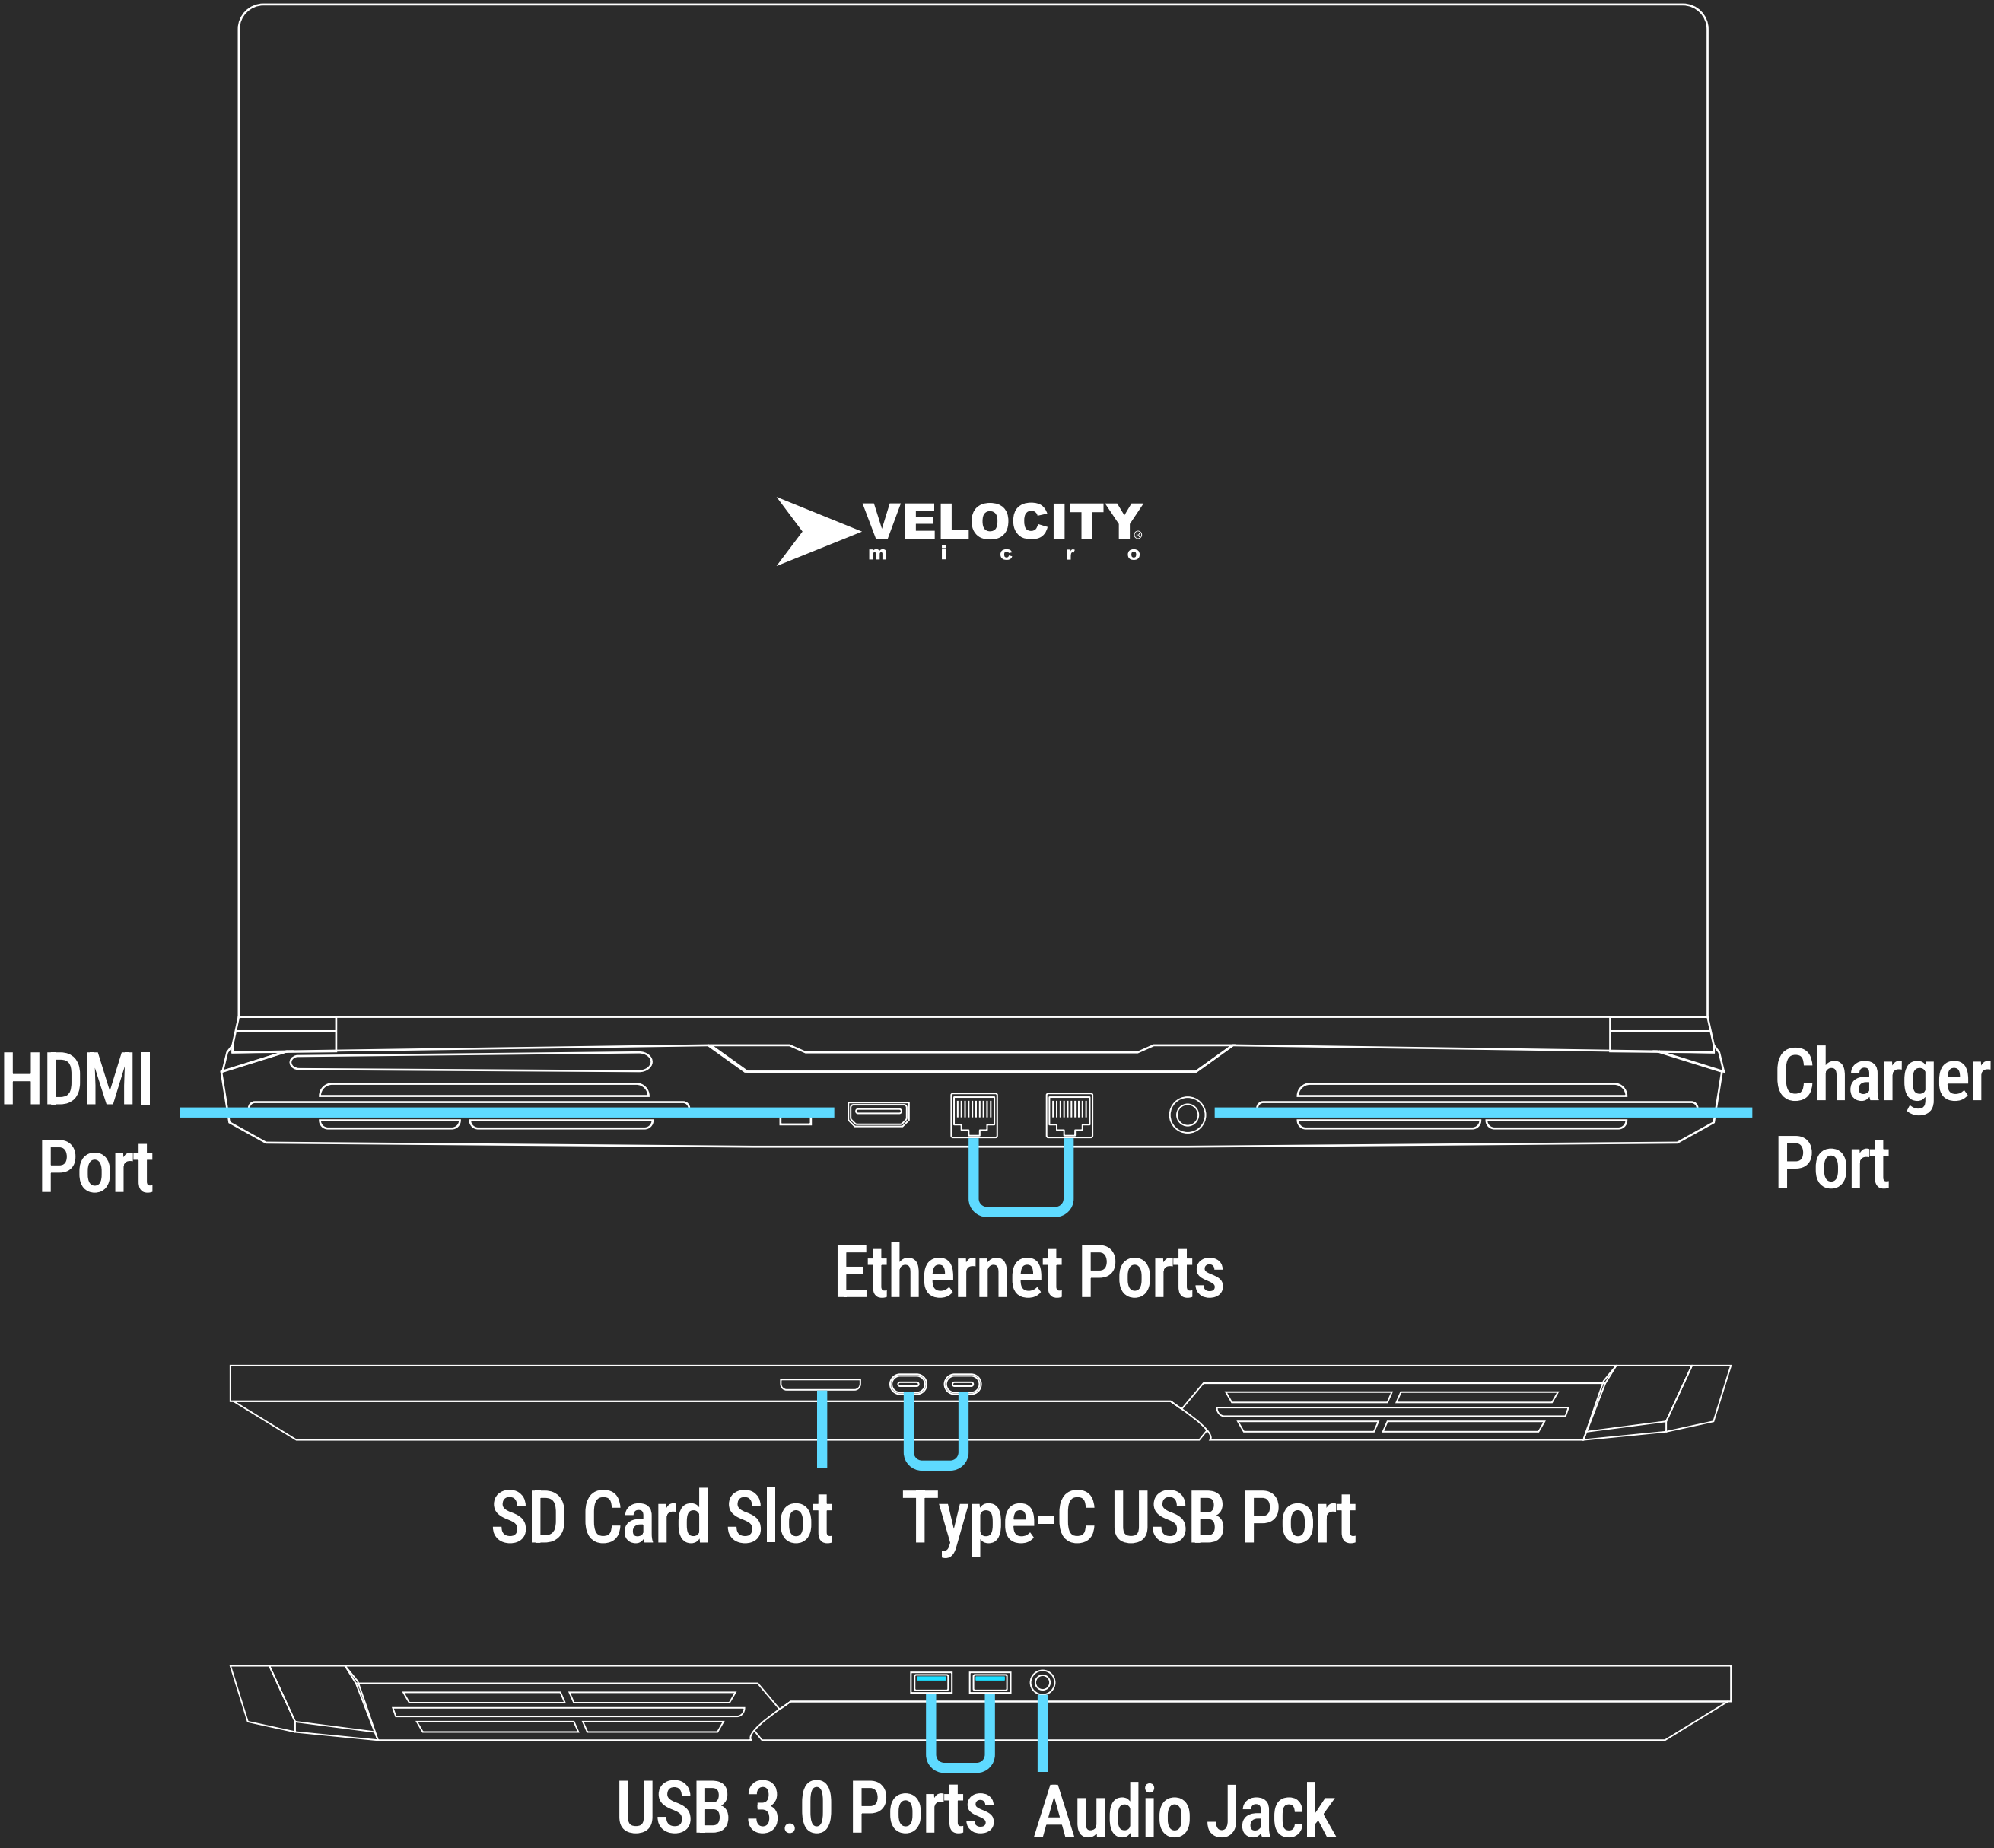

If you'd like to speak with a Velocity Micro support representative, please contact us via the options below. Be ready to provide your warranty number, available on a sticker located on the back or side panel of your system.

4- AUDIO

Your laptop has integrated speakers that require no setup, but you can connect auxillary speakers to the appropriate ports. Your speakers may use AUX or a type of USB port in order to connect to your PC - regardless of which type, they should be able to connect.

NOTE: If attempting to connect bluetooth speakers, make sure to do so within the bluetooth menu of Windows.

2-in-1 Audio Jack

5 - CHARGER

Plug in your laptop's charger to the barrel connector on the back of the device. Your laptop may also support USB-C charging - confirm with your Laptop's manual before attempting to do so.

6 - POWER ON

Turn on your laptop by pressing the power button located above your device's keyboard.

If your laptop does not boot, assure that your charging cable is securely attached.

7 - ENTERING WINDOWS

Windows will already be activated and a local user has been created with your name. You may add a password or sync your Microsoft account if desired.

NOTE: Keep a copy of your activation keys (which should be attached to your PC via a sticker) in case that you need to reinstall Windows in the future.
